

During the last three days I have been working with your team, led by Remus Cretu. Although work is not over yet, I would like to use this opportunity to comment about the professionalism and great attitude of the guys here.

We have sat with many companies before, but here I found amazing creativity, open minds, will to experiment, seriousness and good customer service. Remus is doing a great job in managing the Blue-print process and is treating me with great care. The programmers are top-class people and experts and I am enjoying their feedback and enriching thinking.

Tonight we will conclude the long process we have conducted here and will inform you of our progress and results. Until then, I would like to say again we are happy to work with you and your team and wish both parties success in the coming project.

Best regards,  
Erez Yerushalmi

Although we tried hard to find it, we finally get the perfect solution for our needs. Even we were skeptical at first, you were shortly convinced that we made the best choice with EyePartner. The team acted with more professionalism than I have ever seen in my collaborations with other companies.

Even though their application was not perfectly suitable for what we needed, EyePartner accepted to customize it in order to fulfill our needs. In the shortest time possible, they have created a complete software with features so complete that exceeded even our most optimistic expectations.

Thanks to them, we manage to host a great festival film. We know that the success of the festival is owed to this great team, that provided a software which allowed us to attract a lot more clients than we ever expected to visit our event. I will say without any doubt that it was a pleasure to work with EyePartner and I will never hesitate to do that again if I have the opportunity.

Best wishes,  
James Howard

I have started to work with EyePartner a few years ago for developing some websites and I am completely satisfied with their work. They are very dedicated to what they are doing, and they complete the projects in the shortest time possible.

They are very receptive to all my suggestions and are always ready to do all the changes I want them to. The collaboration with EyePartner is very productive, and I never thought about choosing the company that I work with since I began collaborating with this amazing team.

With their professional programmers and talented designers, they managed to create a lot more than just websites. They created complex communities for people with different interests and desires. Their work brought a lot more success to my projects than I ever expected them to have. In addition, that happened in the shortest time possible.

I will continue to work with the EyePartner team, because I know that its people are the most professional one in this field.

Sincerely,  
Ruben Kachian
